“Ajudo times de desenvolvimento de software entregarem com mais produtividade”

X3

O que é comum ouvir  
quando falamos de  
DevOps para  
grandes empresas

**“Não há valor direto  
para o cliente ou  
negócio em adotar  
DevOps.”**

**“Não há ROI em aplicar DevOps em código legado.”**

**“DevOps só funciona  
em startups, não em  
empresas  
corporativas.”**

**“Investir em DevOps  
requer tempo e  
pessoas, dois itens  
que não temos.”**

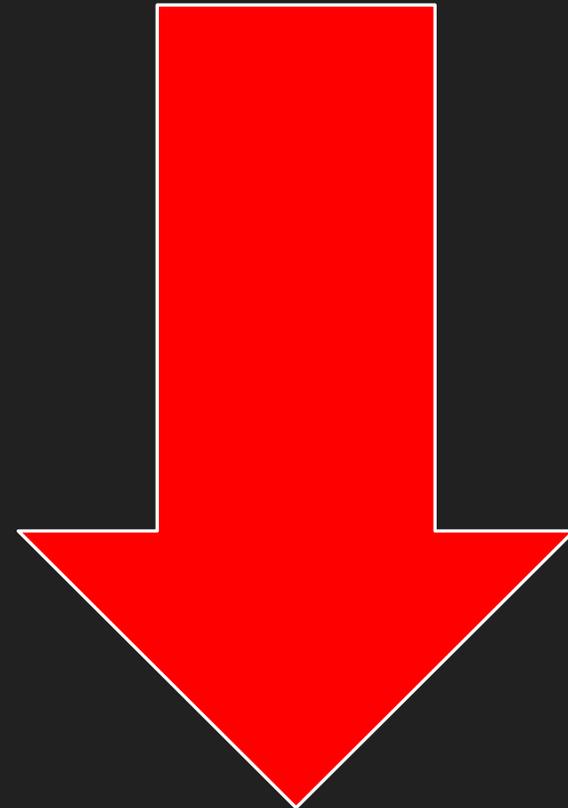

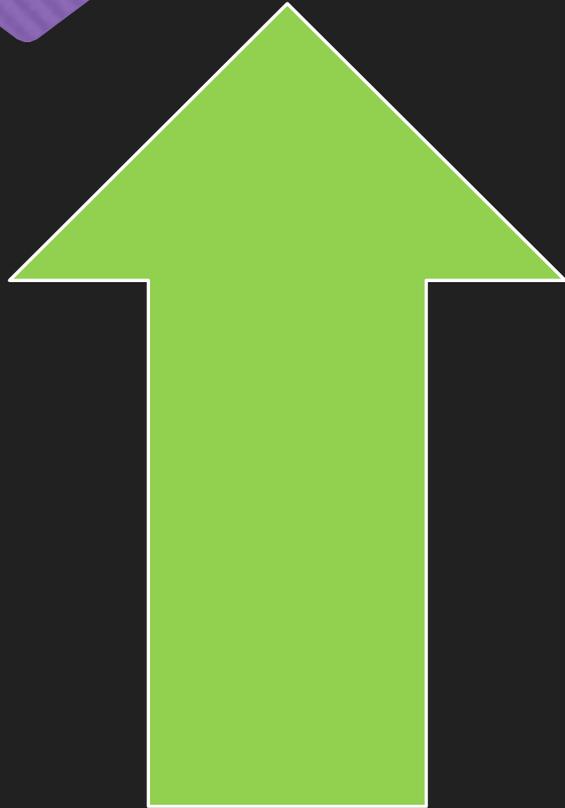

“Tenho que seguir a SOX, não consigo ter um processo de DevOps.”

“Não temos os  
problemas que  
DevOps se propõe a  
resolver.”

“Quero implantar  
DevOps na minha  
empresa”

## Manifesto for Agile Software Development

We are uncovering better ways of developing software by doing it and helping others do it.  
Through this work we have come to value:

**Individuals and interactions** over processes and tools

**Working software** over comprehensive documentation

**Customer collaboration** over contract negotiation

**Responding to change** over following a plan

That is, while there is value in the items on the right, we value the items on the left more.
